- **Back-End:** Laravel, REST APIs
- **Version Control:** Git, GitHub, GitLab, Bitbucket
- **Methodologies:** Agile, Scrum, Kanban

EDUCATION

• Computer Science Engineering (2018 - 2023)

Universidad Autónoma de San Luis Potosí

• AI Model Development Training (2024)

Flexible Vision, San Diego, California

Focused on understanding AI development workflows and implementing JavaScript for AI-driven web solutions.

ABOUT

Computer Science Engineer specializing in web development, with expertise in designing and implementing dynamic, scalable, and user-friendly web applications.

EXPERIENCE

• Full Stack Developer Grupo TI

Jan, 2025 - Present

• Full Stack Developer Bentho Automation

Nov, 2022 - Feb, 2025

- Led a comprehensive project for a university conference event management system
- Developed a user registration and payment system, unlocking access to event selections (similar to Ticketmaster)
- Built an admin interface for editing, adding, or deleting content
- Managed attendee handling, including payment registration, validation, sending attendance recognitions, team generation for activities, and individual attendance tracking using QR codes
- Developing an AI system for a production line, capturing images of cans to verify quality

• Hardware Lab Intern Computer Engineering Laboratories, UASLP

Jan, 2022 - Jan, 2023

- Programmed Arduino devices using C++
- Debugged and resolved programming errors
- Assisted students with circuit wiring and troubleshooting
